

The Arts Program

In the field of the arts there are various opportunities how arts can be developed for use in rehabilitation programmes. Arts can also be used in the cross-cultural relationship building programmes. Youth@HEART plans to develop reconciliation programs in schools/society through the medium of the arts. In order to create a healthy environment where young people (irrespective of race, culture, gender and religion), will be accepted, respected and given the opportunity to develop a healthy lifestyle. Then, they will handle their own crises™, and take up their responsibility to create a healthy and happy community! Youth@HEART is currently searching for individuals with this vision to champion the development of the Arts department of the organisation.
